WILSON HOBBS

Web Developer & Videographer

ABOUT ME

I am first and foremost a young, passionate creator. I have experience in a multitude of media, such as web, video, and music, and use that knowledge to create unique products. My technical background is in web development; I am self-taught and have been actively developing personal and contract projects for five years. I play several instruments, and have played classical music and jazz in ensembles. My most recent endeavor has been in video production, creating personal- and editorial-style videos on my YouTube channel.

I am eager to work on new and challenging projects, and to learn from my more experienced teammates. I pay close attention to every detail, and if something's not good enough, I'll go at it again until it is. I do my best work in a collaborative environment, while still having time to work individually on tasks. I'm excited to improve myself and my creative endeavors through working with other knowledgeable professionals.

EXPERIENCE

BEAKR   2014 - Present
Developer

I developed a platform for The Lovett School's athletic department to keep track of athletes called Beakr, which is still in use after several years. Built with Ionic, Angular, and Firebase.

MOBILE APP HERO   2017
Developer

Over the summer, I worked to make mobile apps and servers for startup clients at this consulting firm. I worked on a small team of designers and developers to iterate quickly.

CHICK-FIL-A HOWELL MILL   2014 - 2017
Team Member

During this year-round job, I learned to work with the restaurant team towards an excellent customer experience.

CONTRACT WORK

TEACHX   2018
Mobile App and Backend

PROGRAMMING SKILLS

- HTML5
- CSS3
- SCSS
- JavaScript/ES6
- TypeScript
- Angular
- AngularJS
- Node.JS
- Express
- Nest
- MongoDB
- Firebase

OTHER SKILLS

- Final Cut Pro
- Logic Pro
- Adobe Photoshop

I developed the full-stack mobile application for TeachX using Ionic, Nest, Node.JS, and MongoDB. The project had complex data structures and view-model issues that I was able to overcome.

THE LOVETT SCHOOL   2017
Mobile App with Firebase

Over a several week sprint, I built a logging app for music instructors at The Lovett School using Ionic and Firebase. This data also mapped to a Google sheet, as well as an administrative dashboard, where the client could read the data stored in Firebase in a user-friendly format.

EDUCATION

UNIVERSITY OF SOUTH CAROLINA   Starting Fall 2018
B.S. in Computer Science

THE LOVETT SCHOOL   2014 - 2018
High School Diploma with High Honors

VIDEO WORK

[Dear Doctor King](#)

In this short film, I talk about Dr. Martin Luther King's legacy and applying his lessons to our modern world.

[Atlanta Streetcar](#)

I set out to make this film with the intent of criticizing the Atlanta Streetcar project, but after gathering some opinions from Atlanta residents, I changed my mind.

[I Love My Friends](#)

In this personal short, I explore a more sensetive side of myself, and use music to convey emotional connection with the viewer.
